OKLAHOMA SCIENCE FAIR COMPETITIONS

In the Oklahoma Science and Engineering Fair programs the main emphasis is on individual scientific research. These programs help students to learn how to conduct research activities and how to explain the results of their work through both written and oral presentations. Science and engineering fairs in Oklahoma are progressive in that students earn the opportunity to move from local level events at individual schools to competitions at regional, state, and international levels. Students who participate in the fairs have the opportunity to win numerous awards that include cash awards, scholarships and exciting trips.

A good way to begin is to visit with a science teacher at your school about a research project of your own. You may also want to contact the director of the regional science fair in your area for more information. You can find information concerning the regional science fair competitions and the state level competition known as the Oklahoma State Science and Engineering Fair (OSSEF) in this brochure and on the Internet at http://ossef.ecok.edu.

OSSEF BOARD OF DIRECTORS

Rahmona Thompson  Ada
Mary Kay Tarver  Ada
Steven Thompson  Alva
Steven Maier  Alva
Lee Carvell  Bartlesville
Elizabeth Allen  Edmond
Julie Rohde  Miami
James Wilson  Muskogee
Derryl Vinters  Muskogee
Dick Mattes  Tulsa
David Juarez  Wilburton
Adam Ryburn  Oklahoma City
